Experience

Round2POS
Full Stack Developer
Butler, PA | May 2020 - Present

- Mentoring CRM and POS team members to adhere to company design guidelines and successfully implement performant and effective Svelte components.
- Researching, advocating for, and helping implement work management tools and major company technologies, including Git Flow, Pull Requests, Code Reviews, Playwright, TailwindCSS, Figma, AM Charts, AG Grid, and the migration from Sapper to Sveltekit.

Round2CRM
- Designing and building the majority of reusable Svelte components being utilized in a large, complex sales management tool.
- Continuously creating and collaborating to create critical user-facing features from database to end user with PostgreSQL, GraphQL, Typescript, and Svelte.
- Refocusing visual design throughout the CRM by encouraging changes that are consistent with company branding, and taking advantage of TailwindCSS for an implicit utilization of a design system.

Round2POS
- Quickly acquired working knowledge of Dart and Flutter with GetX to integrate Figma designs and build reusable components.
- Led a large redesign of the Backoffice component for the POS by constructing a design system with Figma and working with team members to implement.

Bank Partnership Management Tool
- Worked with a small team to build a mobile-friendly 'mini CRM' from the ground up that is now being used by several bank partners to generate leads.

Skills

Languages
Svelte
Sveltekit
JavaScript
TypeScript
HTML/CSS
TailwindCSS
Flutter
Dart

Data Tools
GraphQL
PostgreSQL
Hasura
Apollo

Utility
NodeJS
Figma
Git
VS Code
Jira

Education

Auburn University
BS Computer Science
Minor Graphic Design
Auburn, AL | 2019
